SUBJECT INDEX TO VOLUME 36

A Finite Element Method, for Casting Simulations, 657
A Numerical Model, for Simulating Axisymmetric Rod Growth, in Three-Dimensional Laser Chemical Vapor Deposition, 251
A Numerical Study, of Buoyant, Pulsating Exchange Flows, Through a Vent, in a Thin Horizontal Partition, 263
A Numerical Study, on Buoyancy-Driven Flow, in an Inclined Square Enclosure, Heated and Cooled on Adjacent Walls, 585
Analysis of Internal convection, with Variable Physical Properties, via Integral Transformation, 699
Analysis of Laminar Mixed Convection, in Inclined Semicircular Ducts, Under Buoyancy-Assisted and Opposed Conditions, 527
Analysis of Two-Phase Radiation, in Thermally Developing Poiseuille Flow, 489

Combined Effect of Inertia, and a Spanwise Pressure Gradient, on Free convection, from a Vertical Surface, in Porous Media, 725
Combined Thermocapillary and Buoyancy-Driven Convection within Short-Duration Pulse-Heated Liquid Droplets, 839
Comparison of Different Versions, of the Conjugate Gradient Method, of Function Estimation, 229
Conjugate Natural Convection Heat Transfer, in an Open-Ended Vertical Concentric Annulus, 639
Control Volume Finite Element Numerical Simulation, of Mixed Convection, in an Air-Cooled Cavity, 615
Coupling of Three-Dimensional Field, and Human Thermoregulatory Models, in a Crowded Enclosure, 601

Double-Diffusive Natural Convection, in a Vertical Porous Annulus, 153

Effect of Density Change, on Melting, of Unfixed Rectangular Phase-Change Material, Under Low-Gravity Environment, 825
Effect of Two Sinusoidal Protuberances, on Natural Convection, in a Vertical Concentric Annulus, 271
Efficiency of Heat Transfer, Between Opposed Corotating Jets, 35

Film Condensation, of Saturated and Superheated Vapors, Along Isothermal Vertical Surfaces, in Mixed Convection, 375

Gas Jet Impingement, on a Surface Having a Limited Constant Heat Flux Area: Various Turbulence Models, 171

Heat and Mass Transfer, During Drying, in Cylindrical Packed Beds, 201
Heat Transfer, in 3-D Serpentine Channels, with Right-Angle Turns, 781

Laser Heating of Silicon: A Kinetic Theory Approach, 563

Mathematical Modeling, of the Convection Chamber, of a Utility Broiler—An Application, 411
Mathematical Modeling, of the Convection Chamber, of a Utility Broiler—The Theory, 429
Modeling and Solution, of the Solidification Problem, of PCM, Around a Cold Cylinder, 95
Monte Carlo Simulation, of Radiation Heat Transfer, in a Three-dimensional Enclosure, Containing a Circular Cylinder, 395

Natural Convection Phenomena, Affected by Radiation, in Concentric and Eccentric Horizontal Cylindrical Annuli, 473
Navier-Stokes Analysis, of Gaseous Slip Flow, in Long Grooves, 75
Nonsimilar Hydromagnetic Simultaneous Heat and Mass Transfer, by Mixed Convection, from a Vertical Plate, Embedded in a Uniform Porous Medium, 327
Note, on the Use of Momentum Interpolation Method, for Unsteady Flows, 545
Numerical Analysis, of Partially Heated Vertical Parallel Plates, in Natural Convective Cooling, 129
Numerical Investigation, of a Porous Matrix Combustor-Heater, 359
Numerical Investigation, on the Bifurcative Natural Convection in a Horizontal Concentric Annulus, 291

Numerical Simulation, of Three-Dimensional Thermocapillary Flows, in Liquid Bridges, 859
Numerical Simulation, of Transient Cooling, of a Hot Solid, by an Impinging Free Surface Jet, 767

Optimization of Laser Parameters, for Ultrashort-Pulse Laser Recovery, of Stiction-Failed Microstructures, 345

Passive Heat Transfer Augmentation, in a Cylindrical Annulus, Utilizing a Porous Perturbation, 115
Performance Analysis, of Eccentric Annular Fins, with a Variable Base Temperature, 751
Primary and Secondary Instabilities, in a Glass-Melting Surface, 309
Propagation and Reflection, of Thermal Waves, in a Rectangular Plate, 51
Propagation of Thermal Waves, in a Composite Medium, with Interface Thermal Boundary Resistance, 681

Rayleigh-Bénard Convection, in Limited Domains: Part 1—Oscillatory Flow, 1
Rayleigh-Bénard Convection, in Limited Domains: Part 2—Transition to Chaos, 17

Semi-Implicit FEM Analysis, of Natural Convection, in Freezing Water, 449
Simultaneous Identification, of Temperature Profile, and Wall Emissivities, in One-Dimensional Semitransparent Medium, by Inverse Radiation Analysis, 511

Three-Dimensional Transient Thermal Analysis, of a Receiver-Absorber-Converter System, in the Integrated Solar Upper Stage Unit, 807
Transient Natural convection, in a Square Enclosure, with Horizontal Walls, Submitted to Periodic Temperatures, 737
Transient Three-Dimensional Flow Characteristics, of Si Melt, in a Czochralske Configuration, Under a Cusp-Shaped Magnetic Field, 551
